

Evoluent4

An ergonomic vertical mouse

Prevent wrist and shoulder problems with this vertical mouse

The mouse is still the most-used computer and laptop accessory, so a good, ergonomic mouse is essential.

The Evoluent 4 is a vertical mouse, which you hold in a handshake position. With this posture there is less lateral wrist-bending and forearm rotation.

The handshake position of vertical mice keeps the wrist from bending as much to the side while the forearm also turns inward to a lesser degree (Schmid, et al., 2015). This means that muscle activity in the forearm is less than it would be when using a conventional mouse (Quemelo & Vieira, 2013).

Ergonomic: good arm and wrist posture.

Motion: works with your fine motor skills. The Evoluent 4 is fast and very precise.

Unique: you will quickly get used to this mouse and immediately notice its advantages.

Grip: the Evoluent 4 has an improved grip.

Simple: you can easily adjust the cursor speed right away.

Versions: there is also a more compact version (small model), for hands up to 178 mm long from the top of the middle finger to the edge of the wrist (BNEEVR4S).

Cable length:: 215 cm.

Width	86 mm
Height	81 mm
Depth	106 mm
Weight	173 gr
Product code	Multiple versions
