

Axia Max

The Axia Max is an exclusive chair that is particularly suitable for middle to higher management.

Philosophy

"Ergonomics is the study of and attempt to adapt working conditions to the nature and limitations of people. The aim is to increase people's welfare and improve performance".

This principle, which is inextricably linked to human biomechanics, is our profession. Biomechanics is all about physiology (circulation and nutrition of muscles and joints) and mechanics (the forces exerted on the muscles and the locomotor apparatus.) Thanks to mechanics in particular, we have gained an insight into the load-bearing capacity of ligaments and it has been ascertained that static forces on the body are unhealthy and therefore risky.

Axia Max

Axia VDU chairs

Every Axia is particularly suitable for either VDU work or reading and writing. There are various versions of the Axia VDU chair. A number of important features can be seen in every version.

Every Axia offers the dynamic seating option. The seat and backrest move in concert, ensuring the correct support for the pelvis while the angle between back and seat remains the same.

The armrests do not move with the chair in the dynamic seating position. This ensures that, while you are working, the armrests remain in the same position relative to your desk. In this way, the lower arms receive

optimum support in any posture and the user cannot become jammed between the armrests and the desk. The armrests can be adjusted to the required width and ideal height: as an extension of the desktop. The foremost part of the seat is fixed, so that only the rearmost part moves up and down. The result: optimum and comfortable support when sitting passively and correct activation of back and stomach muscles when sitting actively. This keeps the seat height correct at all times.

All Axia chairs are available in a range of suitable upholstery materials. Another option is to supply your own materials.

Axia Max

The Axia Max is an exclusive chair that is particularly suitable for middle to higher management.

This chair is exclusive in terms of its design, quality and functionality. The Axia Max has earned this status thanks to its adjustable pelvic support and upholstered seat back.

The Axia Max has all the features of an Axia VDU chair and can be completely adjusted to suit the wishes and requirements of each individual user. The chair offers extra ergonomic sitting comfort thanks to its high back and optional headrest.

design: Well Design

Functions which need to be changed during work can be operated on both the right and left hand sides of the chair.

Option: Headrest

The Axia Max has an optional headrest. This headrest is unique, thanks to its modern design and multi-adjustability with minimum controls. This headrest has an easily adjustable height and depth movement range. It can be adjusted three dimensionally using only 2 controls.
